

PRPS-700L~1500L-ND

Powder Spray - Shatter Proof Type

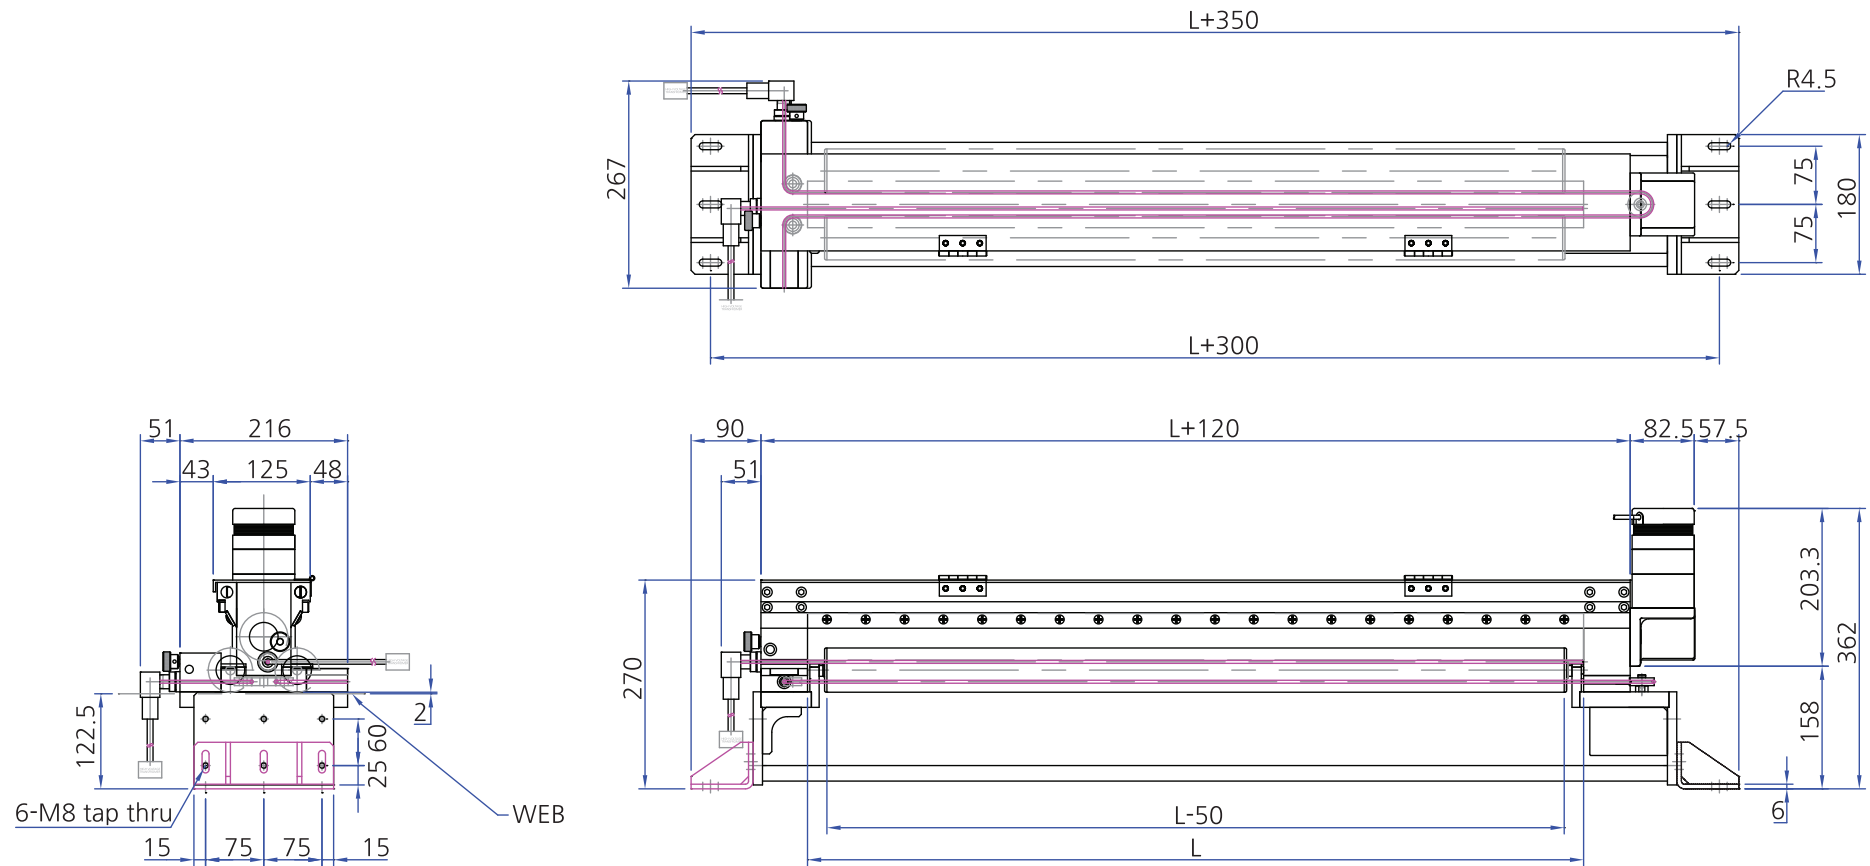

This is a device used to spray powder on the materials to be overlapped after post-processing or printing in order to prevent them from sticking together. (Shatter Proof Type)

1. By obtaining the engineering space to spray, it has superior performance to spray stably.
2. Due to improved structure design, the durability and the way of stable multi high voltage plasma make spraying performance better.
3. It can operate and control two embossing rollers of powder sprayer respectively, so it is easy to set the amount to spray powders.

DIMENSION

SPECIFICATIONS

Product Name	PRPS-700L~1500L-ND
Length of spraying roller	700 ~ 1500mm (The products beside this length are custom made.)
Motor / Moller	BLDC - 24Vdc / 3 Phase 220Vac, 60Hz * 2ea (50Hz - Option)
The ratio of deceleration	1/2000 Basic (1/1000, 1/3000, 1/4000 Option)
Power and Voltage	220Vac, 60Hz (50Hz - Option)
Weight	78kg (Based on 1000L-ND)

※The product which is bigger than PRPS-1500L and below PRPS-700L is of specification to be specially ordered. (Please mark the Hz when placing the order.)
